

Privacy Notice

Introduction

At TOOLSA, we are committed to protecting the privacy of our users. This Privacy Notice outlines how we handle personal information related to verifying certificates via QR code scans. Our website allows users to view certificate details without the need for providing personal data, ensuring privacy and security for all users.

Information Collection and Use

Types of Data Collected: TOOLSA does not collect personal information from users simply wishing to verify certificate details. Access to certificate verification is granted through scanning a QR code, which does not require the submission of personal data by the user.

Purpose: The QR code system is designed to provide users with direct access to certificate details without the need to collect or process personal data. This system ensures that certificate verification is efficient, secure, and private.

Data Sharing and Disclosure

TOOLSA does not share any personal data with third parties, as we do not collect personal information for certificate verification purposes.

Data Security

We take the security of our systems seriously. Although no personal data is collected through the QR code certificate verification process, we implement robust security measures to prevent unauthorized access to our systems and to ensure the integrity of our certificate verification process.

User Rights

Since TOOLSA does not collect personal information for certificate verification, there are no specific user rights related to personal data processing under this context. However, we are committed to respecting privacy and are open to inquiries or feedback regarding our privacy practices.

Changes to This Privacy Notice

TOOLSA reserves the right to update or change this Privacy Notice at any time. We will notify users of any changes by posting the new Privacy Notice on our website. We encourage users to review this Privacy Notice periodically for any updates.
